

# MacCommerce™ Designer

The powerful, secure, customizable e-commerce solution, built for Mac® OS X

## Much more than a shopping cart

MacCommerce™ Designer is not just shopping cart software. The latest NetStores product combines the ease of use of the NetStores® E-Commerce Solution with the security of the Mac® operating system --- everything you need for comprehensive e-commerce --- backed by NetStores superior training and support.

### Easy E-Commerce for Designers

Designers appreciate software that combines simplicity and power.

**Drag-and-drop shopping cart tools** for Macromedia® Dreamweaver® and Adobe® GoLive® --- no programming or scripting required.

**Quick setup of online stores** with the option of full customization --- the designer has total control over matching the website's look and feel.

**New dynamic template tools** for fine-tuning of the customer interface.

**MacCommerce™ Server shopping cart** engine is locally installed, with licenses for two online stores.

*NetStores has been helping businesses make money online since 1995. Let NetStores be your partner as you navigate the complex world of e-commerce.*

*For more information about the exciting new MacCommerce™ products, talk to a NetStores representative at (888) 345-4322, or visit [www.NetStores.com](http://www.NetStores.com) and [www.MacCommerce.com](http://www.MacCommerce.com).*

## Powerful Features for Merchants

Merchants appreciate the flexibility and full-featured functionality of our database-driven order processing system.

**Flexible customer interface** with multiple payment options, calculation of shipping and handling charges and sales tax.

**UPS OnLine® Tools** for real-time calculation of shipping and handling charges and shipment tracking.

**Secure Socket Layer (SSL)** compatibility for secure credit card transactions.

**Back-end support** for popular accounting programs such as Intuit® Quickbooks® and Quicken®.

**Optional credit card gateways** and merchant accounts.

**Custom business integration services** to help integrate our order processing with existing systems to maximize efficiency.
