

MacCommerce™ Server

for Mac® OS X Server

The powerful, secure, customizable e-commerce solution.

Easy E-Commerce for Developers

Drag-and-drop shopping cart tools work seamlessly as extensions to Macromedia® Dreamweaver® and Adobe® GoLive®. No programming or scripting is required.

Online stores can be set up quickly with the basics, or customized - the designer has total control over matching the website's look and feel.

New dynamic template and catalog tools make it easy to customize your customer interface.

Powerful Features for Merchants

UPS OnLine® Tools for real-time calculation of shipping and handling charges and shipment tracking.

Multiple credit card gateways include Authorize.net®, VeriSign®, PayPal® and WorldPay.

Secure Socket Layer (SSL) compatibility for secure credit card transactions.

Back-end integration with popular accounting programs such as Intuit® Quickbooks® and Quicken®.

Control, security and power

MacCommerce™ Server gives developers and ISPs the opportunity to host an infinite number of online stores using the latest Mac® OS X Server technology. The control, the security, the power is yours.

A Comprehensive E-Commerce Solution

It's not just a shopping cart. MacCommerce™ Server combines the simplicity of drag-and-drop tools with the power of the shopping cart engine --- everything you need for a total e-commerce solution. Optional merchant accounts, credit card gateways and secure digital certificates make the e-commerce solution complete. Custom business integration services by NetStores experts enable companies to integrate their e-commerce solution with existing systems. And MacCommerce is backed by the NetStores superior training and support.

NetStores has been helping businesses make money online since 1995. Let NetStores be your partner as you navigate the complex world of e-commerce.

For more information about the exciting new MacCommerce™ products, talk to a NetStores representative at (888) 345-4322, or visit www.NetStores.com and www.MacCommerce.com.
